

Gimme Aname

carry the sign

English edition ☺

This is the second revised edition,
the first edition was published in 2021.
Germany, November 2025.

It won't last much longer...

Read on and find out how we can save this world and
manage to give each other peace and love again and still
be able to exist in thousands of years.

Foreword

1. What is the goal of humanity?
2. How is it currently?
3. What can we do?
4. carry the sign...
5. The sign
6. Why the sign?
7. What is the goal?
8. Does that make sense?
9. Appendix

Foreword

The author of this book had a dream, he dreamed of a healthy planet with healthy people living in peace.

The author of this book wants to contribute to the preservation of our planet with this book.

Of course, this book was written with the hope that the enlightened reader will carry the sign, at least covertly.

1. What is the goal of humanity?

Humanity can only have one goal,
the colonisation of space.

It doesn't matter what religion or denomination we belong to, but if we believe in one God, it can only be our goal to spread God's word everywhere.

And if we don't believe in God and still believe that life makes sense, then we also believe in evolution, because there is enough evidence for that.

If evolution makes sense and humans are not just there for fun, then the goal can only be to conquer space.

In order to colonise space, the Earth must remain liveable until humans manage to live in space without the Earth.

Until humans succeed in living in space without the Earth, hundreds, perhaps thousands, of years will pass, and that is how long it is necessary to live on Earth.

The probability of a disaster destroying the Earth is very low, so we actually have plenty of time to conquer space...

2. How is it currently?

Up to now, for humans, there is only our earth to live on, and this earth has developed over billions of years and will continue to exist for a few billion years.

We are a closed ecosystem, every gram of poison that we blow into the air, every gram of poison that we throw into the oceans remains on the earth and returns to us.

Our fields are exploited and over-fertilised, the rivers are polluted and everything ends up in the sea. The air is polluted every day with particles that didn't exist before the industrial revolution. We breathe and eat all of this every day.

It is scientifically proven that the earth is warming up, the only question at the moment is how long it will be before Greenland is ice-free or the Gulf Stream stops flowing.

The climate will change completely, persistent weather extremes and severe droughts/storms/hurricanes/floods will become the norm.

The seas will rise, slowly at first, then faster and faster.

We can only survive such a horror scenario if we all finally stick together, stop fighting each other and act as quickly as possible.

Unfortunately, that is not the case!

We want a world without war, a healthy earth.

That's why we need to stick together and show that we don't want it that way!

At the moment, people are overdoing it and we have reached a cutting point, and if we carry on like this, we will eventually become just another vanished civilisation.

For the earth itself it probably doesn't matter, a kind of mankind, which needs only a few million years of evolution, could possibly evolve on our earth again.

All the measures we have taken so far may not bear fruit for many, many years and until then we will continue to poison the planet, and ourselves.

In other words,

- the air,
- the water,
- the soil,
- the light,
- and therefore also the people,

are getting worse every day.

3. What can we do?

We can stick together and show that we don't want to live like this.

We must act as quickly as possible and do everything we can to make the earth a better place again.

In this world, no matter where people live, this is only possible with money. A lot of money, which is there, but is currently being used for other projects.

The powerful and rich of this world must do everything with money and laws so that

- the seas are cleaned and remain clean.
(Cleaning up the oceans, cleaning up the rivers, preventing further pollution)
- the food is healthy again.
(Organic farming, organic animal husbandry)
- the air is clean again.
(Renewable energies, no more fossil fuels, global reforestation, filtering the air)

We need to make a statement to show, that this is what we want, and that we believe, that the people, who could, are doing too little to help the earth.

Of course, each individual can make their own contribution, but in order to save the earth, global action must be taken.

The super-rich and powerful and the big corporations need to know that we want more to be done for the lives of our children and our children's children on this planet.

Whoever wants to, may follow me, and wear the sign.

Those who carry the sign are treated like friends.

Friends don't fight each other, no matter who they may be, no matter what community they belong to or where they come from.

Let's show that we want something to finally happen here.

It is actually already too late, but if many people want it, then perhaps a peaceful and healthy life on this planet can still be realised.

We could build ships to clean up the oceans.

We could equip all the world's dirty rivers with filters.

We could buy rainforest and reforest it.

We could invest more in air filtration systems.

We could invest more in organic food.

We could promote alternative energies more.

Smart people are sure to have many more good ideas on how we can help the planet

If humanity still exists peacefully on this earth in a thousand years' time, it will not be Caesar's or Hitler's name that goes down in history, but the name of the one who saved the oceans and the air.

4. Carry the sign...

All people who want to show that too little is being done for the earth and its people by governments / powerful people / billionaires and all those in positions of responsibility wear the sign.

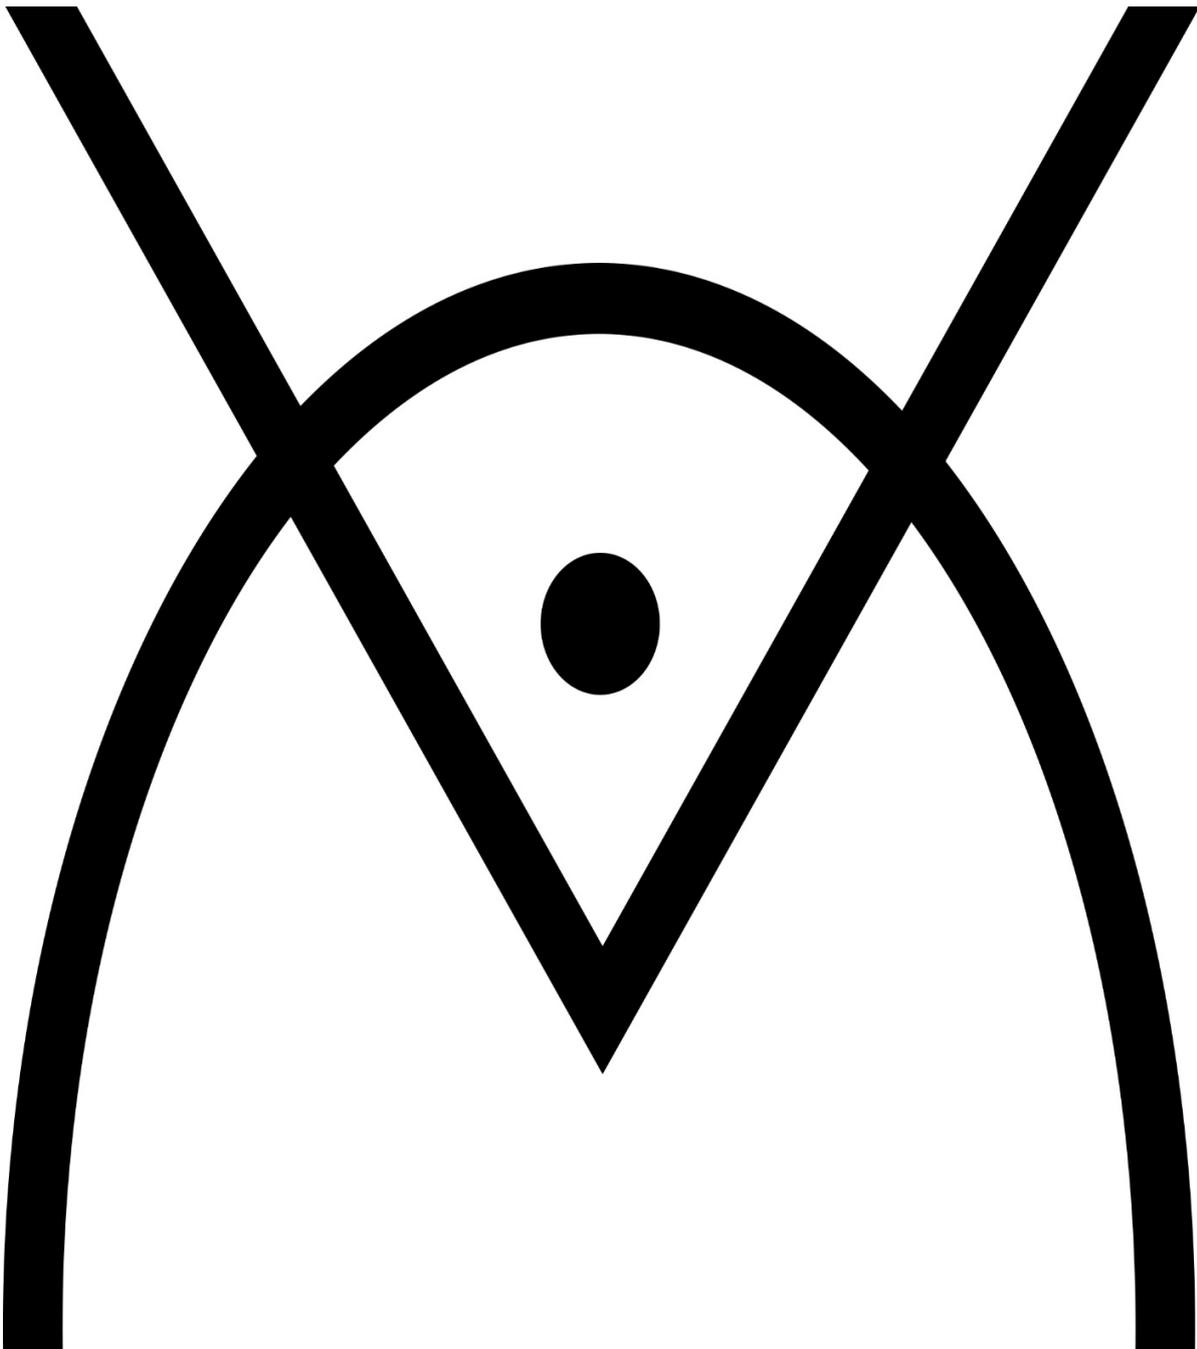

The sign will help and protect you, because everyone who carries the sign treats you like a friend.

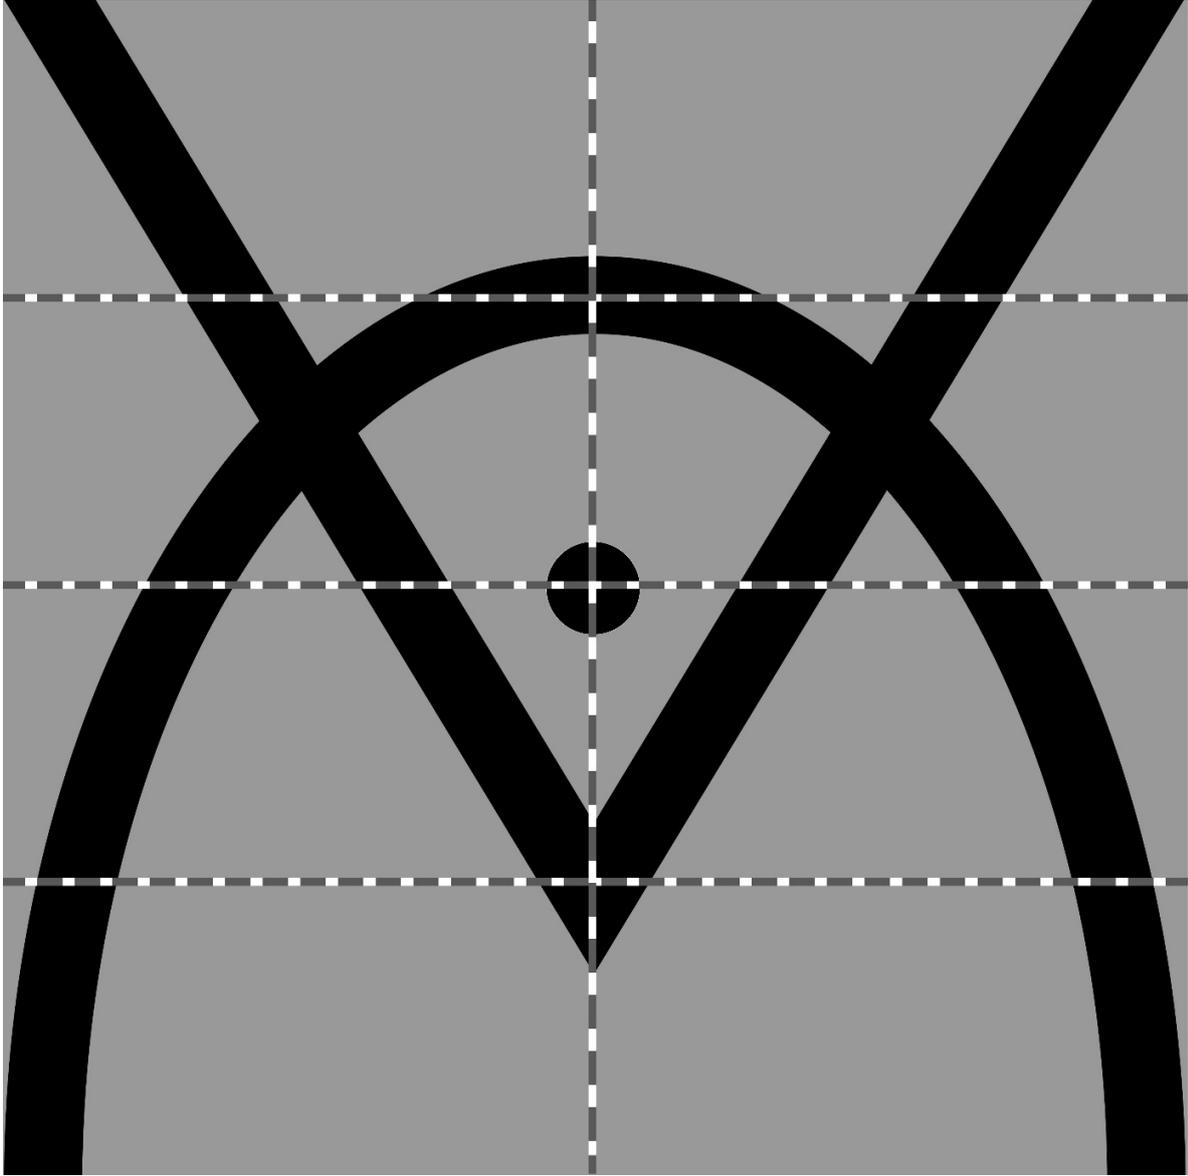

Paint it in your hand, or wear it completely open or hidden, just as you like.

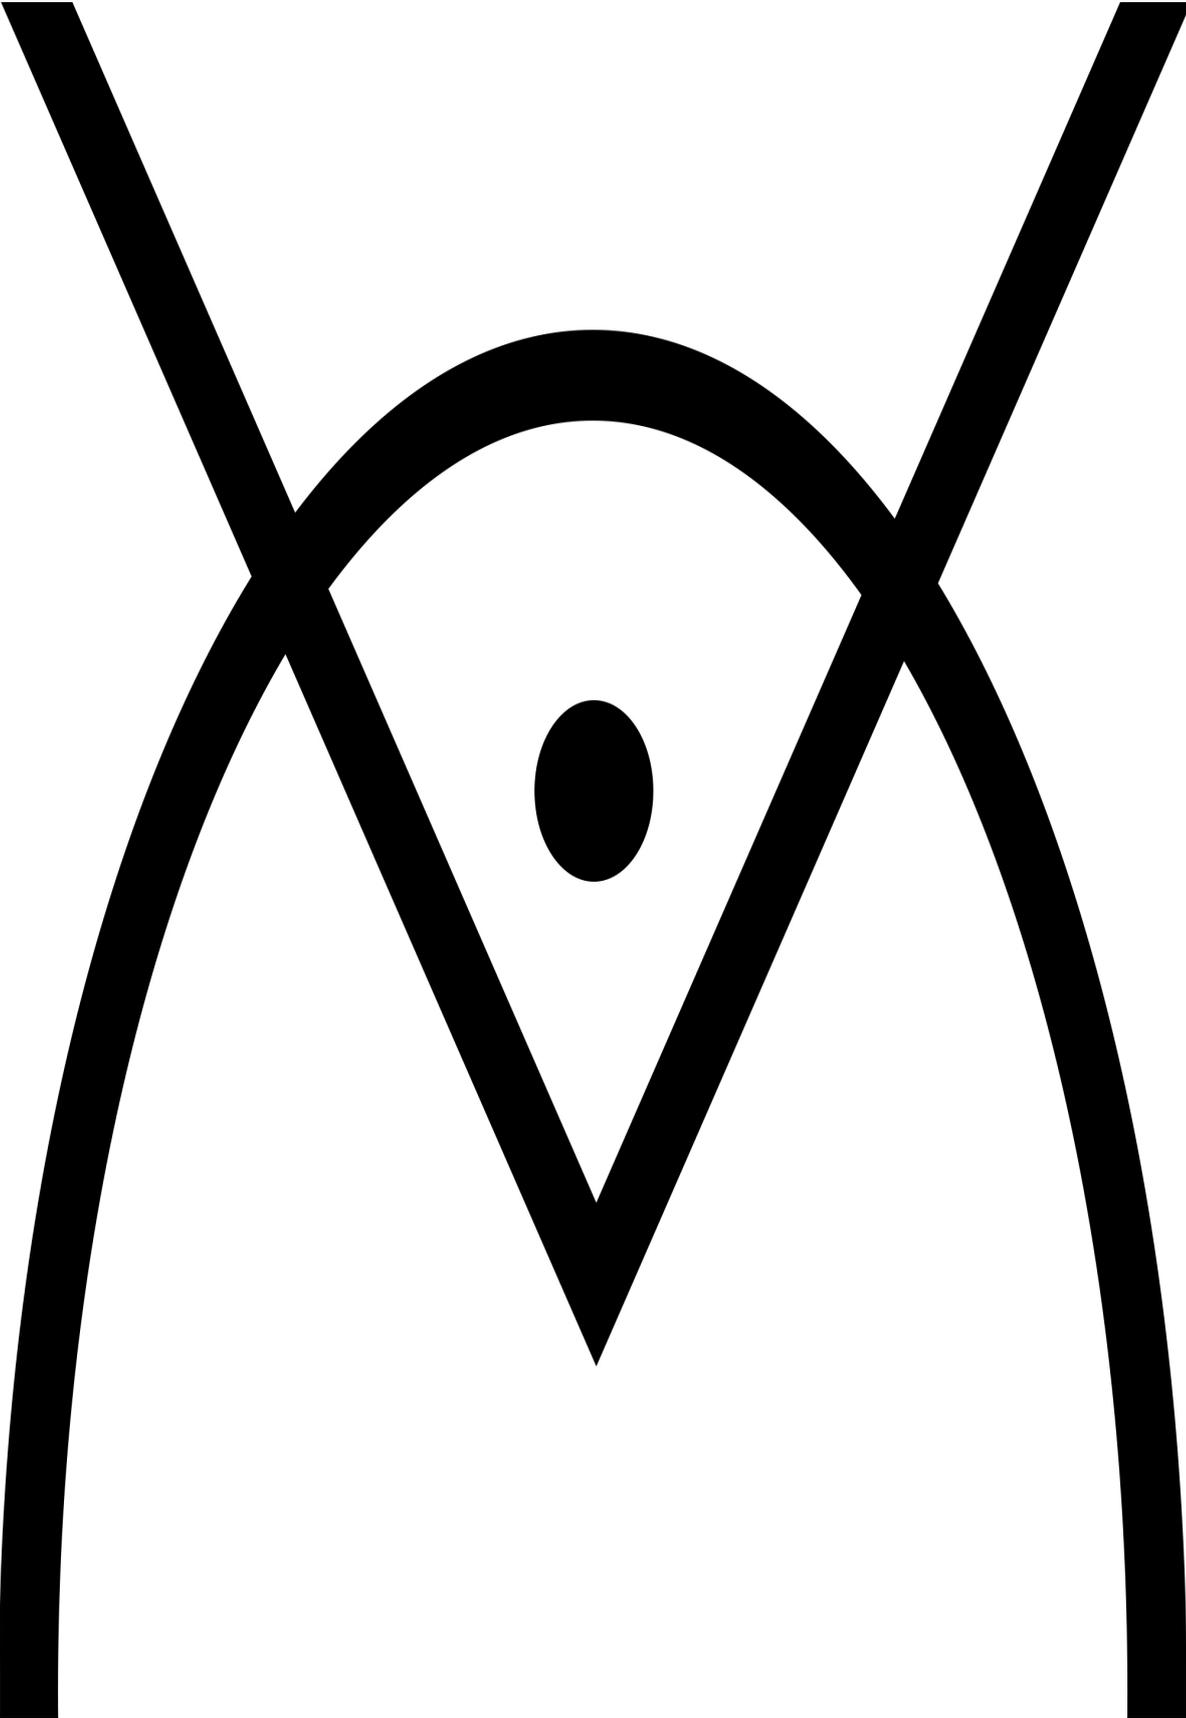

If you can't or don't want to carry the sign, then you should at least know his name (Gimme Aname).

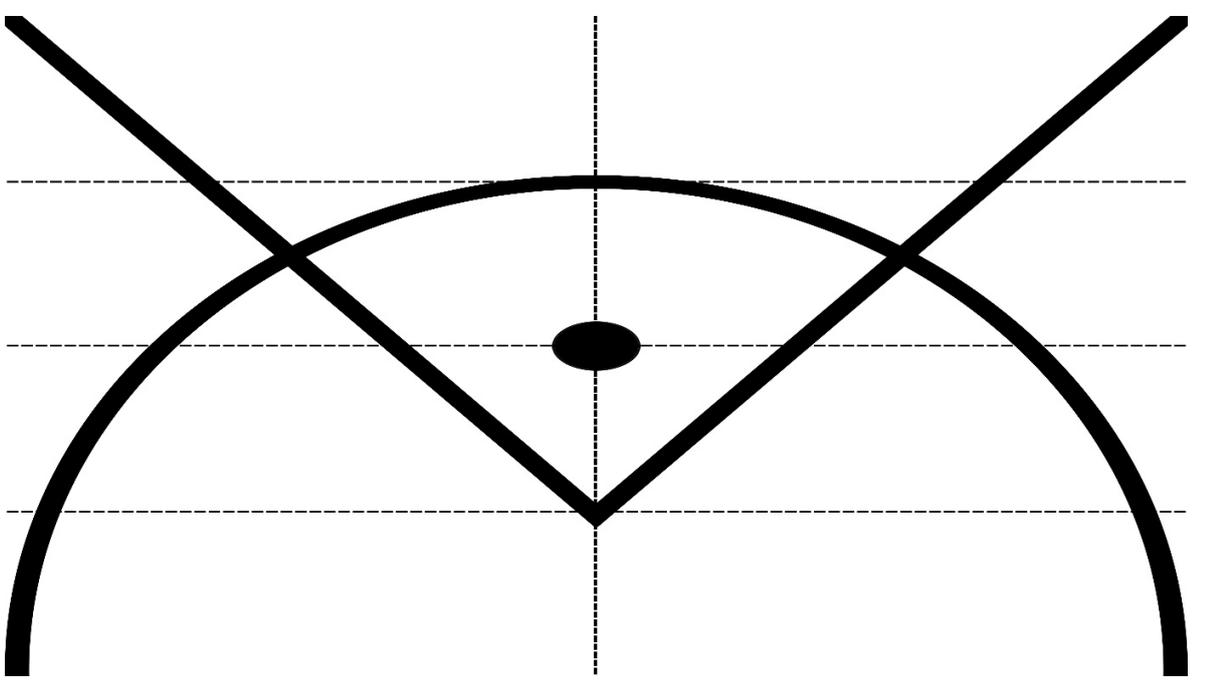

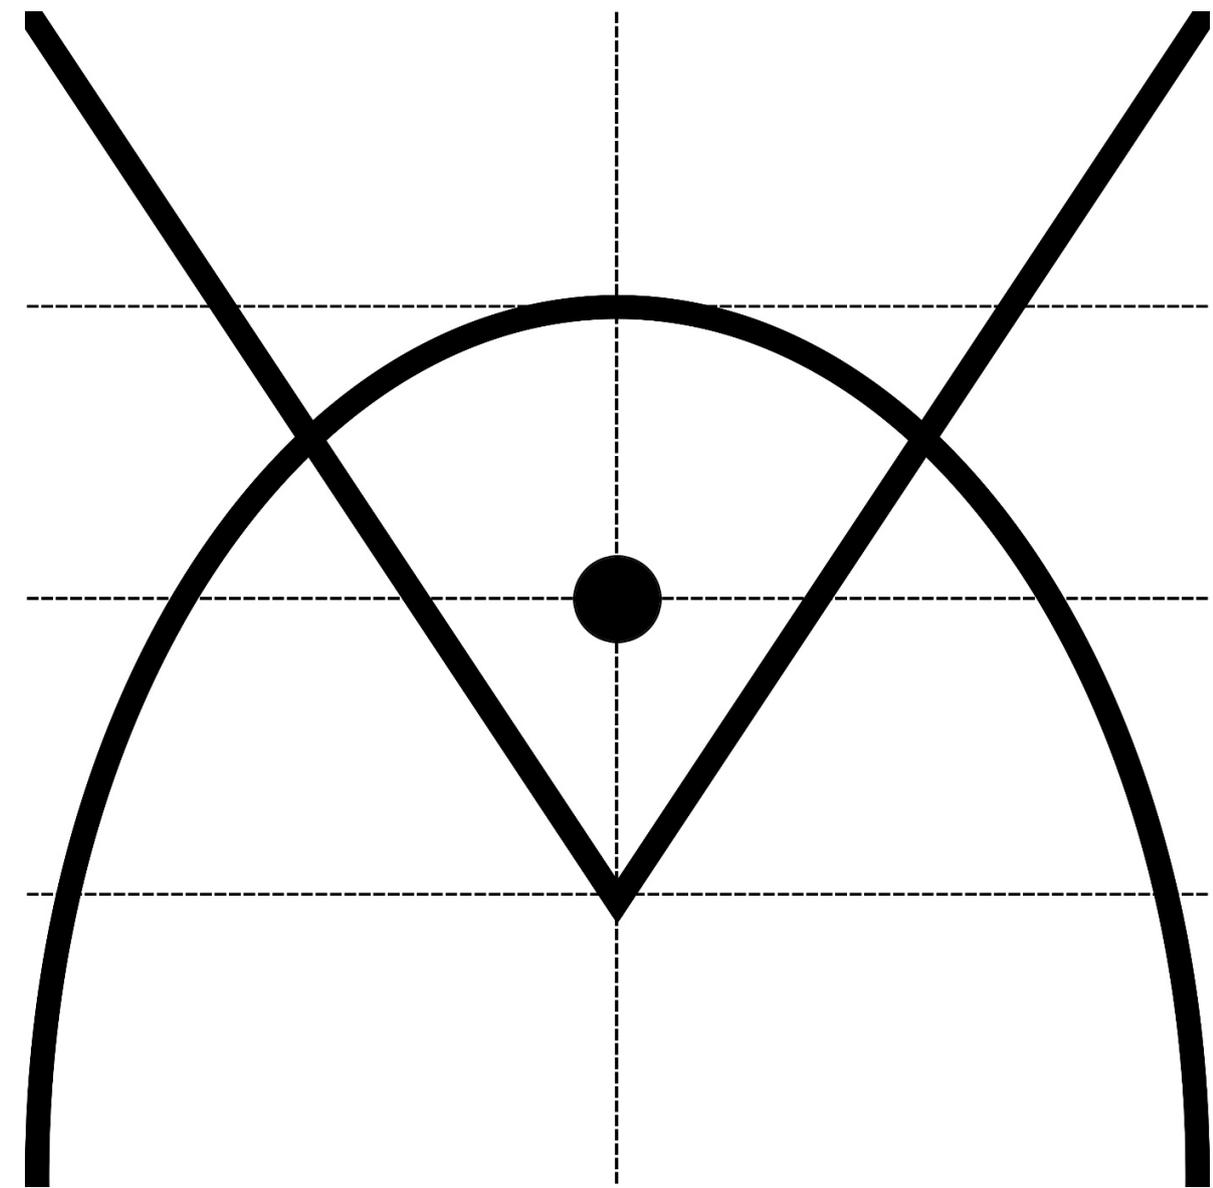

Honour and peace to those who bear the mark.

5. The sign

6. Why the sign?

Whoever carries the sign says:

1. „Anyone who carries the sign is my friend, I do not fight against friends.“
2. „You up there, with the money and the power, finally do the right thing!“
3. „I won't fight you, no matter what else you do or what religion you belong to, if you carry the sign“
4. „Put an end to wars, let's be friends.“
5. „He who bears the mark is my friend.“

The sign primarily points to the poor state of the earth, because if the earth is doing well, people are also doing well:))

7. What is the goal?

The goal is for every person on earth to wear the sign, because then there will be peace.

The goal is that every person, regardless of origin, religion, ethnicity or gender, carries the symbol, because those who carry the symbol do not fight against each other and want this planet to become healthy again.

In thousands of years, a healthy planet with people living in peace with each other could achieve the most improbable things that we cannot even imagine today.

8. Does that make sense?

Of course, it only makes sense to carry the sign if more and more people stand up and show what they think of those who have enough money or power to stop the destruction of the environment and don't do so.

The destruction of the human habitat is progressing and the money to clean up rivers and the sea simply has to be there.

If we only had 10% of the world's defence spending at our disposal, we could achieve so much, see appendix for list.

Whoever wears the sign should also stand by it, regardless of whether the sign is worn openly or concealed, and if not, then at least know his name.

9. Appendix

What should happen urgently?

Forming an alliance for:

- clean rivers and clean oceans
- reforestation / preserving the rainforest
- renewable energies
- electric or hydrogen cars
- only organic products
- alternative drives for aircraft and ships

Let us:

- ✓ develop better methods to clean up the oceans and rivers.
- ✓ build a huge ship that can remain in the waste vortex for years and dispose of the waste.
- ✓ ensure that no more plastic ends up in the oceans.
Really, if that's what we wanted, what's the problem?

- ✓ reduce pesticides.
Make sure insects live and everyone can breathe healthy air.
- ✓ save rainforests and reforest them.
Buy the rainforest from the people, there is enough money.
- ✓ promote electromobility and hydrogen propulsion quickly.
With all kinds of energy production and locomotion, only fast away from fossil fuels.
- ✓ make flights more expensive.
Flying is dependent on fossil fuels for the foreseeable future....
- ✓ ban trawling.
Destroy the entire bottom just to catch a few shrimp?
- ✓ continue to reduce fishing globally.
- ✓ change from fattening livestock to organic livestock.

✓ goods belong on the railroads, not on the roads or in the oceans.

Well, it goes without saying that the railroads run on renewable energy.

Take active action:

✓ Clean up the oceans and rivers.

✓ Build filters and filter the air.

Yes, I know it will be difficult, but I had a dream, I dreamed of a healthy planet with healthy people 😊

Unfortunately, the emphasis here is on FAST, everything we have done to date for climate protection is far too slow and too little.

- PEACE AND HONOUR WITH YOU -
- Peace and a long and healthy life to all my friends with the sign.
- - It makes you strong if you believe in it.

Here you can practise the sign, or simply create your next shopping list:
